Day Three: Paper Snowman Ornaments

You will need

- White card
- Orange card
- Sticky tape
- White ribbon
- Scissors
- Pencils
- Glue stick

Instructions

1. Print and cut out your templates. You'll need you'll need the two circles, snowman arms and snowman nose for this one!
2. Draw around your circles on white card, you'll need 3 big circles and 3 small circles. Cut them out carefully, or ask an adult to help you. Then fold all of your circles in half.
3. Tape the same size circles together at the folded edge. The easiest way to do this is to take two of them, put them folded edge to folded edge and tape them together. Turn them over so you can't see the tape. Then add the third folded circle on top of one side, and tape it down. Turn the third circle like a page in a book, and tape the other side too.
4. Position the smaller circles above the larger circles with no space in between. Now you'll need to add the ribbon. Make sure it runs all the way up the card, and leave some extra at the top to make a loop. Tape it down all the way up the circles.
5. Make the loop at the top and tape that down as well. Adjust the snowman so the card shapes look like spheres.
6. Time to cut out your snowman features! You can cut the nose out of orange card, and glue it to the edge of one of your circles in the smaller top sphere.

Paper Snowman Ornaments Method (continued)

7. Cut out the snowman arms, you can do this with brown card, but we used white card and our pencils to save on paper and give them a more wooden look!
8. Glue the arms to the edge of the circles in the bottom larger sphere, make sure they are on opposite sides of the sphere.
9. We recommend adding an optional red pipe cleaner scarf around his neck to complete the look!
10. There you go, a beautiful paper snowman! Hang from your tree or wherever you like.

Not Letterlandy enough for you?

Why not make an Oscar Orange Ornament instead? You'll only need the larger circle template and some orange card for this one. Follow the instructions to make a sphere, and tape the ribbon. Add the Oscar Orange arms instead of the snowman ones - remember to put them on opposite sides of the sphere!

The best way to add his face is to flatten the sphere once you've stuck the arms on. Draw one side of his face onto the card, then turn one of the semi-circles like a page, and draw the other side of his face. Now you'll see him in 3D!
