

Everlasting Snow

You will need

- A mixing bowl and spoon
- 500g cornflour
- 1 bottle of hair conditioner

Instructions

1. Tip your cornflour into the mixing bowl.
2. Add a couple of tablespoons of conditioner to the cornflour to start with. Mix together with a spoon.
3. Grab a handful of your fake snow mixture and scrunch it together in your hands. If the snow holds its shape, then it is ready. If it is still too crumbly and dry, add a little more conditioner.
4. Once your fake snow is the right texture, have fun experimenting with it. You could make a miniature snowman, or practice your letter formation by tracing the shapes in the snow! The best part is, your hands won't get cold and your creations won't melt!
