What sound does Sammy usually make in words? Yes, he likes to hiss 'sss...' very loudly. How does Harry Hat Man feel about noise? That's right, he hates it! So what do you think happens when Sammy comes slithering and sliding up behind Harry in a word? Do you think he will put up with all that noise? Absolutely not! He turns back and says, "sh!" to hush Sammy up.

Sammy came slithering up behind Harry at the seashore today, hissing loudly, so Harry had to say, "sh!" again. Sammy and Harry like to sit in the sunshine and look at all the things by the shore. They can see shells, shrimps and fish in the sea. Those fish should keep a sharp eye out for that shark in the shallow water!

Can you see the shepherd shearing his sheep? There are four shy sheep who don't want to be sheared. Can you find them for him?

Silent Magic e has made Mr A appear and wave as he says his name in some words!

It's cold in Letterland and the lake has frozen. Mr A came up the lane with a spade to clear the snow so now it is safe to get to the frozen lake. Snowflakes are still falling so Golden Girl has put on her cape to keep warm while she skates.

A boy and girl are having a race to the lake. Can you see them in front of the cave?

Nick has made a cake and brought some grapes on a plate to eat after he has had a skate. He also brought a game to play. Can you see it? It's Snakes and Ladders. He loves the game but I think it'll be too late to play when they have taken off their skates. What a shame.

In Letterland, there are five roller-skating robots who cause trouble by capturing vowels even though they know they shouldn't. This one is called **Arthur Ar** and he likes to capture Letterland apples. Look! He is running away with Annie Apple! She is too surprised to make her usual sound. Instead, all you can hear is **Arthur Ar** reporting back to the ringleader, Red Robot, with his last name, "**Ar!**"

**Arthur Ar** waited until it was getting dark. He thought he could get up to his tricks by the light of the stars, but now he's stuck trying to escape from a large barn! The guard dog has started barking to raise the alarm. And now the farmer has found **Arthur's radar car** parked in his yard. **Arthur Ar** is darting around the barn trying to escape, but there's a guitar, tarts, sharp darts and jars of varnish in his way. Even a little armadillo is trying hard to catch **Arthur Ar** and stop him from getting away in his radar car!
